Sky Deutschland GmbH on behalf of NTT Data Italia and VT Solutions & Consulting

Main activities and responsibilities:
SKY DE on behalf of NTT Data Italia in NEW-CRM project. Main Topics:

- Data modelling and data partitioning in a Google Cloud Platform ecosystem using Big Query.
- Development of Dataflow job using Scala for Ingestion and processing realtime data (Avro) ingested by Kafka.
- Development of Google Airflow DAGs using Python to perform ETL operations on data for DWH.

[Oct 2020 – Feb 2021] **Big Data Analyst Consultant**

Telecom Italia S.p.A. on behalf of Bip and VT Solutions & Consulting

Main activities and responsibilities:
Big Data Analyst on TIM Genomics Project. The main task was to write some guideline documents about the main approaches and best practices in a Big Data platform and its reference environment. The two documents were mostly on Big Data development and architecture with particular attention on the following points:
- Software component structure and code documentation.
- Git integration Strategy (with particular focus on branching models like Git-Flow and GitHub-Flow, code and environment promotion).
- Data Lake principles (data ingestion, data preparation, data exporting, testing).
- Lambda architecture, data modeling, data preparation, partitioning.
- Analysis for migration of Cloudera Ecosystem to Google Cloud Platform.

[Jan 2020 – Oct 2020] **Big Data Engineer Consultant**

Enel S.p.A. on behalf of ATOS S.p.A. and VT Solutions & Consulting
